

My team is still working on the Pandit and customer app and have tried hard to resolve issues listed below which are provided for your end.

Some issues are getting pending which will be updated next working date and some issues I have given clarification also for your understanding.

Green highlighter goes to be resolved and red highlighter i have to submit clarification.

Pandit Registration:

- Upon submitting the OTP button the app was slow to move to the registration page.
- Description- While typing the description it is all coming in one line and not showing as the paragraph. We were not able to press the key "Enter" to move to the next line. Please correct this and add an auto spell check.
- City- Pl add an auto spell check i.e. Suggestion after a few letters.
- Experience- Can we change the Tag from "Experience" to "Experience (in Years)". We were able to write the Experience in words and counts.
- Mother language- We were able to write the Experience in words and counts. Can we have the selection options like how it's there in other languages?
- Pl add a highlighter like a * on sections which are compulsory.
- Past Mandir and Current Mandir are optional.
- Add the provision of a location pin just after the "Operational address" as discussed in the last meeting. Currently, the address we are typing shows the address suggestions but not the actual one. Since the operational address has to be accurate and not directional we discussed adding a google pin after it in the last meeting.
- Bank name- Any possibilities of spell check here?
- Pandit name- His Full name should come automatically as he added at the beginning of the profile.
- Sensitive things like Adhaar, Pan, Cheque and Signature, need to have the option of camera. Since these are sensitive information, Pandit will not be comfortable sharing this with an unknown person on whatsapp first who will then upload from his Tab on the app. Hence like Banks we should have the camera option.
- Call Charges- Pl add a Rupee symbol.

Current Address: Implement to the new input field for current Address

- OTP- Message was wrong during submission.

• Images are added all in one go, but practically images to be added one by one e.g. Adhaar section. Hence need to have individual image upload and delete options in case the Pandit by mistake uploads a wrong file.

Note: Now images are added all 4 in one shot because here we implement multiple picker options and it is not possible to remove photos one by one. If I want to upload photos one by one then I will implement a single picker and not be able to upload all in one go. Now I have given the Clear All option to remove all photos and upload next.

• Puja listing- We missed adding hours for Pujas which are beyond 1 day. There are Pujas which go for 5 days but only 4 hours a day. Can we please see if you can fix this?

Note: At the customer end I have provided only 2 slots in a day like 7 AM to 1 PM and 3 PM to 7 PM. If a pandit create a puja maximum 4 hours then the customer able to select the slot from both otherwise when any Puja duration above 4 hours then it is selecting a day by default for that pandit.

• Puja blocks time- When a Pandit is not able to work for a certain time, we need to block his calendar. I think we spoke about this during our last meeting while closing the UI.

Note: I have given access to offline/online for both services for any pandit inside Schedule option. When Pandit is not able to work for a certain time then go to offline the profile from the schedule section.

• Puja Listing- Don't need the Puja Date, I believe we spoke about this also.

Note: I have managed to create Puja when to start that particular pandit otherwise I will remove the date fields during Add Puja.

• Edit Option- Pandit to have Profile edit options for everything except for the sensitive financial bearing e.g. KYC- Aadhaar, Pan, Cheque, Signature & Commission, Call Rate and Puja rate. If they have to change these then they have to ask the admin.

Note: Inside Pandit app I have no option to update profile for previous discussion. When any pandit need to updating profile then he will contacting to admin panel and admin will changing their information from admin end, hence now I am not created update profile only view the TNC agreement on profile screen.

Thanks
